The Shine Learning Enrichment Communities provide academic extension and expansion for students identified as possessing either outstanding aptitudes or strong competencies in one or more domain of the curriculum.

Within the program, the teachers provide a student led, challenging curriculum that enables the talents of Shine students to emerge, be recognized and further developed within a community of like peers.

Shine learning enrichment communities engage in a range of expanded learning opportunities including, but not limited to, integrated extension, inquiry and project-based learning, competitions and philosophy.
